

BREATHE THE NEW LIFE INTO YOUR EXISTING NURSECALL

WHAT IS NEXUSCARE?

NexusCare is a powerful messaging platform that delivers critical alerts and messaging for carers. Developed by technology experts with a proven track record in the care industry, Nexus takes alerts from your existing nursecall system, delivering the information to smart devices removing the need for pagers and noisy wall screens.

WHAT ARE THE BENEFITS?

- Upcycle your current nursecall system without having to replace a thing
- Silence your nursecall, offering tranquility for residents and staff
- Nursecall alerts delivered to Smartphones
- Cloud based reporting of all nursecall events across your entire estate
- Improved response times to critical alarms
- Integration with digital care records

WHAT'S THE PROCESS?

-  Online demo
-  A straightforward monthly payment plan, tailored to your needs
-  A small middleware box and application for smart phones
-  Full online training for managers and staff
-  Ongoing support

NEXUSCARE KEY FACTS

- Nexus means 'a connection or series of connections linking two or more things to a central or focal point' - that's what we do!
- Nexus has handled over 10 million nursecall alerts and counting
- Nexus is installed in hundreds of UK care homes
- The platform was designed and built solely for care homes GHM Care has provided solutions to the UK care marketplace since 2005

CUSTOMER FEEDBACK

For the first time, all is now calm. We don't sound or feel like an institution anymore. As you walk around the home it feels peaceful and like I've always intended a home should be.

The integration between NexusCare and our digital care plans has worked well. The information transfers quickly and the information is really helpful for reporting purposes, especially when we look at accidents/incidents and response times.
